

Adrenal Px DHEA

Health Benefits:

- Adrenal Px DHEA provides hormone precursors to support adrenal function by normalizing the stress response and balancing the DHEA-cortisol ratio.
- The ingredients chosen for Adrenal Px DHEA include DHEA (Dehydroepiandrosterone), pregnenolone, certified organic ashwagandha, and pantothenic acid that work synergistically to offer broad-spectrum adrenal support.
- This adaptogenic formula helps to sustain healthy brain function, mental performance, and combat occasional fatigue.
- This formula sustains healthy hormone production and adrenal function to aid in the maintenance of a balanced stress response.

RF 1040

Formulation Features:

- One capsule provides 10 mg DHEA and 9 mg pregnenolone. Women may prefer 1-2 capsules daily to prevent unwanted hair growth.
- DHEA is converted to androgens, estrogens and other hormones, and it helps neutralize cortisol's immune suppressing effects.
- Vitamin B5 supports healthy adrenal function by helping the body produce and utilize adrenal hormones involved in the stress-response pathway
- Pregnenolone is a steroid hormone precursor and can help promote a healthy immune response and memory formation.
- This formula has a lower dose of DHEA per capsule as compared to Adrenal DHEA 25.

Supplement Facts

Serving Size: 3 Capsules

Servings Per Container: About 25

	Amount Per Serving	% DV
Pantothenic Acid (Vitamin B5) (from Calcium D-Pantothenate)	1,245 mg	24,900%
Calcium (from Calcium D-Pantothenate)	111 mg	11%
Magnesium (from Magnesium Citrate)	50 mg	12%
Organic Ashwagandha root (<i>Withania somnifera</i>) DHEA	51 mg	†
(Dehydroepiandrosterone)	30 mg	†
Pregnenolone	9 mg	†

† Daily Value (DV) not established

Other ingredients: Hydroxypropyl Methylcellulose, Organic Rice Concentrate (Nu-Flow®)

Adrenal Px DHEA supports the adrenal glands to help manage the body's hormonal response to stressors.

Key Ingredients

DHEA (Dehydroepiandrosterone)

DHEA acts as a substrate to support the production of a variety of steroid hormones, including androgenic and estrogenic compounds that help sustain normal physiological function. By participating in adrenal hormone pathways, DHEA helps promote healthy cortisol modulation and supports immune system function during periods of increased demand.*

Pregnenolone

Pregnenolone acts as a parent compound for many steroid hormones, feeding into pathways that produce progesterone, glucocorticoids, and neurosteroids important for overall physiological balance. Pregnenolone supports cognitive processes, including attention and memory, by influencing neuronal communication and promoting healthy brain signaling.

Pantothenic acid - Vitamin B5

Pantothenic acid supports healthy adrenal function by helping the body produce and utilize adrenal hormones involved in the stress-response pathway. It plays a central role in energy metabolism within adrenal cells, supporting their ability to respond to physical and emotional stress. By assisting in the synthesis of coenzyme A, Vitamin B5 helps maintain balanced adrenal activity and overall stress resilience.

Supplementation

Take one to three capsules daily in the morning or as directed by your health care practitioner.

Also Recommended

Adaptogen pairs well with Adrenal Px DHEA, as it provides a blend of adaptogenic herbs to complement the hormone precursors that help the body adapt to stress.
